IN CYBERSECURITY
COMMUNITY

CAE in Cybersecurity Community Symposium

**April
8-10**

2025 Charleston, SC

Welcome to The CAE in Cybersecurity Community Symposium

We are excited to welcome you to Charleston, South Carolina, for this gathering of cybersecurity professionals, educators, and leaders. The CAE in Community Symposium continues to serve as a true national asset in cybersecurity workforce development, bringing together the brightest minds to tackle today's challenges and shape the future of the field.

Within this booklet, you'll find everything you need to navigate the event: keynotes, panels, workshops, speaker profiles, interactive sessions, and networking opportunities designed to foster meaningful connections. Beyond learning and discussion, this symposium is about collaboration—bridging academia, government, and industry to drive innovation and progress.

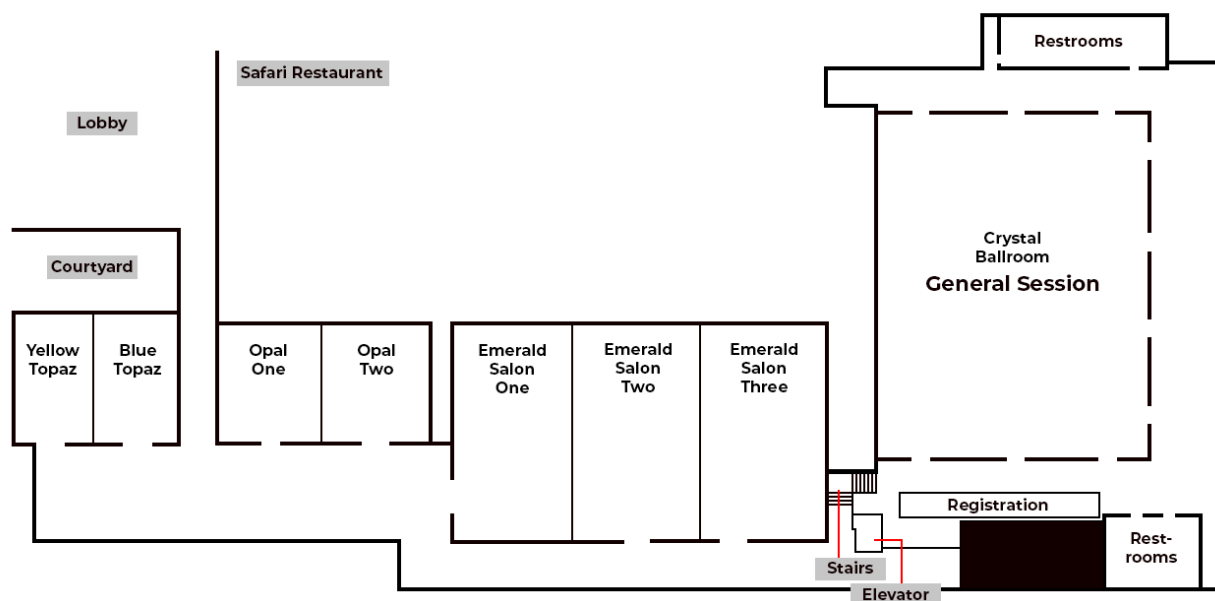

A special thank you to our entire CAE community, government, industry, and event sponsors—your dedication and support make this event possible. We encourage you to engage fully, share your insights, and take advantage of this incredible opportunity to grow professionally and strengthen the cybersecurity workforce.

We hope you enjoy the event and the charm of Charleston!

Cybersecurity Program Coding: Critical to Assessing Education to Workforce Outcomes

In higher education, assessing how existing programs meet employer needs requires identifying existing programs and evaluating alignment between their content and the skills needed in the workplace. It is standard for postsecondary programs to be categorized using the Classification of Instructional Programs (CIP) codes. These codes are used throughout the higher education system to report program characteristics and outcomes to federal agencies and accreditation organizations. This session will share key research findings on the use of CIP codes in higher education to determine if estimating cybersecurity graduates using CIP-based reporting databases are producing results that capture all cybersecurity graduates and can be relied on when assessing whether enough cybersecurity workers graduate to meet the labor market demand and if cybersecurity graduates are employed in cybersecurity occupations and engage participants in an interactive thought leadership exercise driven by the report recommendations.

Presenter: Michele Robinson

Crystal Ballroom

Careers Preparation National Center - Working Group From Competency Statement to Job Interview

In this interactive session, participants will revisit the CAE approach to competency and examine how a well-crafted competency statement can evolve into a strong résumé bullet point and a key talking point in job interviews. Employers and students will perform role-played interviews using the STAR approach to discuss competency experiences. Reflective discussions among participants will then generate the development of practical recommendations to be shared with the broader CAE community.

Presenter: Dr. Sharon Hamilton

Emerald Salon Two

NCAE Educational Resources and Student Advancement

Join us for an engaging session designed specifically for NCAE community educators and administrators. In this presentation, our team will provide a comprehensive update on the RING curriculum and framework, showcasing newly developed resources that seamlessly integrate with your dual credit and dual enrollment educational programs. We'll introduce our expanded counselor and academic advisor toolkit, featuring innovative approaches to student guidance and career pathway development. The session will also highlight our growing catalog of student activities designed to foster engagement, workforce competencies, and practical skill building in cybersecurity.

Presenters: Jesse Hairston, Tania Williams, Benjamin Cummins and Michael Qaissaunee

Careers Preparation National Center / K-12 Cybersecurity Credit Transfer Agreement Development Workshop

NCAE-C Credit Transfer Agreement taskforce is offering an in-person 45 minute workshop for CAE schools on K-12 cybersecurity education and how to develop cybersecurity credit transfer agreements with K-12 schools. During this workshop, participants will share the challenges, opportunities, and approaches to outreach and engage with K-12 schools, identify mechanisms to build partnership with K-12 community including K-12 schools, school district administration, as well as third parties to support K-12 cybersecurity education. The workshop will also discuss how to better support CAE schools to achieve the goals on promoting K-12 cybersecurity education and CTA development. This workshop is part of the effort from CAE-C Careers Preparation National Center (CPNC).

Presenters: Katie Bowers, Rachel Meyers, and Michael Tu

Blue Topaz

Strengthening Educational Pathways with Artificial Intelligence:

This interactive session explores innovative approaches to integrating AI technologies within cybersecurity education programs at NCAE institutions. The EPNC team will demonstrate practical techniques for using AI-powered tools to enhance student engagement and student assessment. Learn how AI can be used to personalized learning paths, generate realistic threat simulations, and generate adaptive content. Participants will discover how AI can transform assessment practices by providing richer insights into student comprehension, problem solving, and identifying skill gaps with greater precision. We'll also share frameworks for teaching students to effectively leverage AI in data analysis, including pattern recognition, anomaly detection, and predictive modeling for cybersecurity applications. The session will also demonstrate how AI can be used to enhance student communication and interview skills and implement a more engaging approach to teaching ethical scenarios.

Presenters: John Sands and Jiri Jirik

Yellow Topaz

CAE
Candidates
National
Center

Candidates National Center & Peer Review National Center

This session will bring together the Candidates National Center (CCNC) and the Peer Review National Center (PRNC) to evaluate current processes, discuss key challenges, and explore opportunities for improvement. This discussion will provide updates on 2025 training requirements, the CCNC tool, and the process for updating requirement documents. The session will then focus on reviewing the mentoring and peer review workflows, identifying common challenges, and gathering feedback from CAE Community. Through open discussion, participants will explore ways to enhance communication, streamline coordination, and improve mentor and reviewer training. The session will conclude with actionable insights to refine processes and ensure greater efficiency in supporting institutions seeking CAE designation.

TRY CYBER

This session will include information on and a live demo of the publicly available and CISA-sponsored Try Cyber tool. Try Cyber is a cyber work role discovery and exploration tool aimed at providing the cyber curious (specifically K-12 and early college students) a day-one, internship style, hands-on experience in in-demand cyber work roles to pique their interest and encourage them to pursue careers in cyber.
